About XPLOIT XCAPE

Xploit Xcape is a flagship initiative by HacFy and the Alva's Cybersecurity Club, designed to challenge and nurture the next generation of cybersecurity talent. As a premier Capture the Flag (CTF) event, Xploit Xcape serves as a dynamic platform where participants engage in real-world simulations of cyber threats, tackling challenges in Web Exploitation, Cryptography, Reverse Engineering, Forensics, and more.

Our mission is to bridge the gap between theoretical knowledge and practical application, empowering individuals to excel in cybersecurity roles. Xploit Xcape is not just a competition—it's an opportunity to showcase skills, learn from experts, and connect with leading organizations offering on-the-spot hiring, internships, and mentorship opportunities.

Whether you're a seasoned hacker or a budding enthusiast, Xploit Xcape invites you to immerse yourself in a thrilling journey of problem-solving, collaboration, and career advancement.

Let's redefine the future of cybersecurity—one challenge at a time.

Event Highlights:

- 1000+ participants from across the region.
- Exciting cash prizes and swags for winners.
- Hands-on sessions with leading cybersecurity professionals.
- On-the-spot hiring opportunities.
- Interactive and engaging problem-solving scenarios.

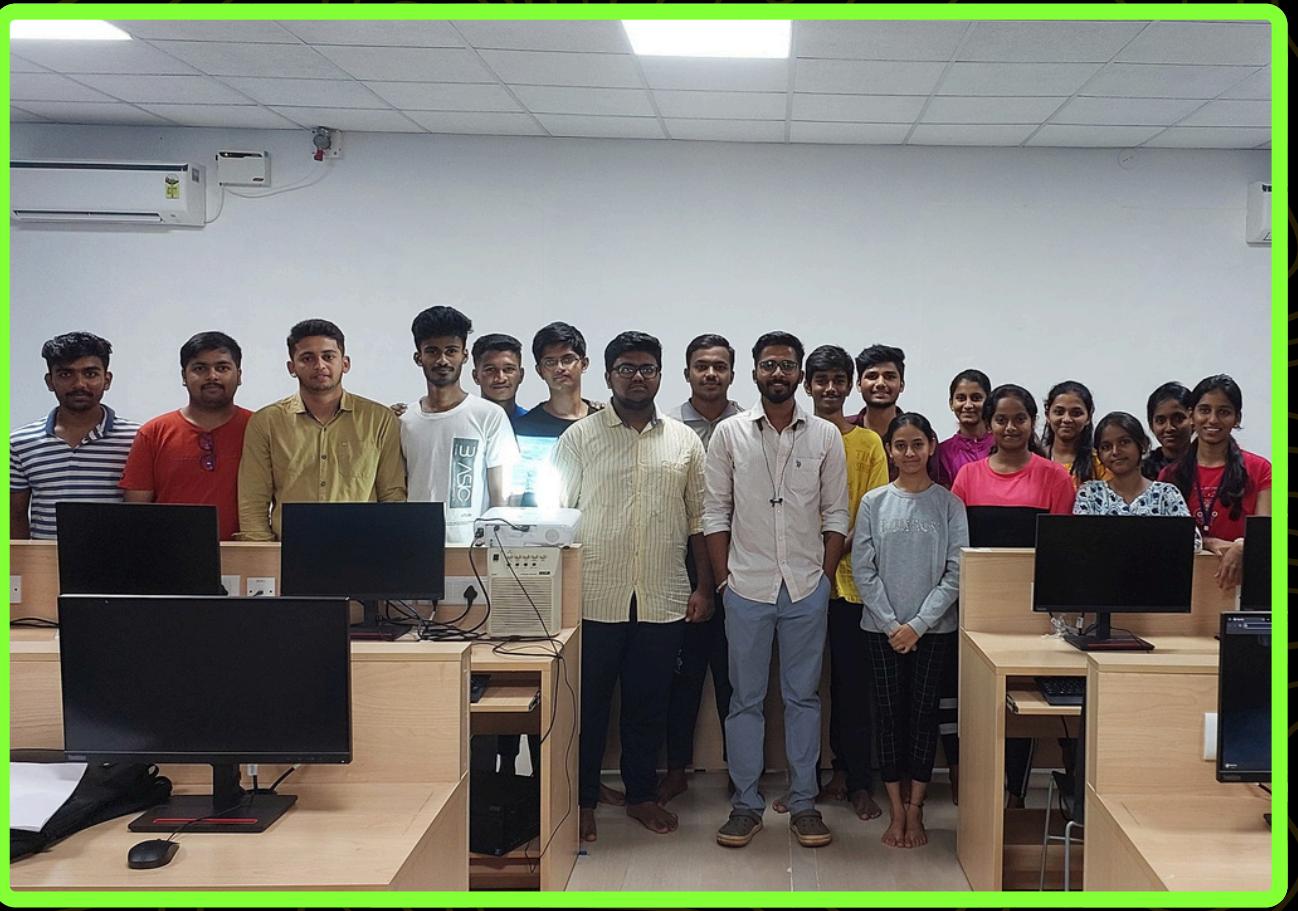

Purpose: Empower aspiring cybersecurity professionals and foster the growth of ethical hacking in the digital era.

About the Cybersecurity Club

Cybersecurity Club at Alva's Institute of Engineering and Technology. Founded in July 2022, the Cybersecurity Club has rapidly become a leader in hands-on cybersecurity education at Alva's Institute of Engineering and Technology. Under the guidance of Mr. Vivek Alva, the club has grown to include students from multiple batches, hosting events like workshops, faculty programs, and industrial visits.

Cybersecurity Finishing School (CSFS):

Our flagship CSFS program offered a **50-day training** course, with over **50** students participating. The program featured weekly sessions with CISOs from leading organizations such as **OLA**, **Razorpay**, and **Bengaluru International Airport**, providing valuable industry insights and practical exposure.

About HacFy

HacFy is a student-led cybersecurity startup founded at Alva's Institute of Engineering and Technology, focused on empowering individuals and organizations with practical cybersecurity knowledge and tools. Recognized as one of the Top 6 ideas in the prestigious Samsung Innovation Challenge, it offers services such as vulnerability assessment, penetration testing, Capture The Flag (CTF) platforms, and tailored training programs. By bridging the gap between theory and real-world application, HacFy addresses a wide range of cybersecurity topics, from ethical hacking fundamentals to advanced security techniques. With a mission to create a safer digital environment.

HacFy fosters innovation by providing resources for continuous learning and skill development in cybersecurity. Through workshops, challenges, and collaborations with industry leaders, it empowers individuals to stay ahead of emerging threats. This helps build a strong, future-ready cybersecurity community.

Key Features of HacFy:

- Revolutionizing cybersecurity education with AI-driven learning and IoT-integrated labs
- Providing hands-on training to individuals and organizations, preparing them for the future of cybersecurity
- Developing an ecosystem for the next generation of cybersecurity leaders.

Why Partner with Us:

- Showcase your brand at the largest CTF platform in the coastal region
- Gain visibility among students, professionals, and industry leaders
- Participate in on-the-spot hiring opportunities with top companies
- Provide real-world challenges (Problem Statements) to participants, fostering innovation
- Contribute to nurturing cybersecurity talent and advancing innovation

Sponsorship & Collaboration Opportunities

Join Us as a Sponsor & Hiring Partner:

By partnering with **Xploit Xcape**, your organization can position itself at the forefront of cybersecurity innovation and talent development. As a sponsor or hiring partner, your brand will gain significant exposure among a highly engaged audience of aspiring cybersecurity professionals and experts from the industry.

On-Site Hiring:

Companies will be present, offering on-the-spot hiring opportunities for exceptional talent. Attendees will have the chance to connect with aspiring cybersecurity professionals in real-time as they tackle and solve challenging problems.

Brand Visibility:

Your logo will be prominently displayed on event materials, banners, and promotional platforms.

Get the chance to enhance your company's presence and reputation in the cybersecurity domain.

Engage with Talent:

Submit problem statements for participants to solve. This gives your company the chance to work on real-world cybersecurity challenges while identifying top talent.

Showcase your industry's real-world challenges to foster innovation and engage with the brightest minds.

Conclusion

By joining Xploit Xcape as a sponsor or hiring partner, your company will have the unique opportunity to attract and engage with some of the brightest minds in the cybersecurity field. This event provides an ideal platform for your organization to connect with aspiring professionals, build relationships, and scout for top talent that aligns with your company's needs. Through hands-on sessions, real-time problem-solving, and on-the-spot hiring opportunities, your company will have direct access to individuals who are passionate, skilled, and ready to tackle real-world cybersecurity challenges. In addition to talent acquisition, you'll benefit from extensive brand exposure across event materials, banners, and digital platforms, ensuring your company stands out in front of a highly engaged audience. This is your chance to position your brand as a leader in cybersecurity innovation, attract exceptional talent, and contribute to the development of the next generation of cybersecurity experts. Join us as a sponsor and hiring partner, and take your organization's presence in the cybersecurity domain to new heights.
